

Single axle utility (galvanized) – GDB

Trailer size	Trailer code	Deck length	Deck width	Deck height	GVWR	Payload capacity	Trailer weight
5' X 10'	GU2	10'	5'	21"	3,000 LBS	2,115 LBS	885 LBS
6' x 10'	GU4	10'	6'	21"	3,000 LBS	1,985 LBS	1,015 LBS
6' X 12'	GU5	12'	6'	21"	3,000 LBS	1,875 LBS	1,125 LBS

Additional information:

- Wire harness is sealed to provide greater protection for wiring
- Wire harness includes 4-way flat plug
- LED lighting (lifetime warranty)

Hot Dip Galvanizing Process

First, the product is dipped in acidic solution and rinsed with cold water to remove the grease, dirt, rust and scale. It is then dipped in a flux solution to remove the last traces of oxide and to wet the steel. When the clean iron is then dipped into a molten zinc solution (typically at 450°C), it forms zinc-iron layers by a metallurgical reaction between the iron and zinc.
